GTZ-ASE

Att. Mr Markus Exenberger

Dear Mr. Exenberger,

I want to express my content with the quality of the organization of Regional Conference: „Sustainable Energy Management in Public Buildings – from Policy to Local Action“. Especially I would emphasized the quality of speakers and their presentations which were very useful for all participants of the Conference.

GTZ team is really responded to the challenge and they did the great job. I think that this year Conference exceeded last year which was really hard to do. This Conference is really important for Montenegro because it was send a clear message that energy efficiency it's topic with high priority.

GTZ has succeeded to keep focus of whole audience on this issue during the Conference which is really a great success.

Quality of this year Conference is reflected in the fact that it participated really famous companies from Germany, Austria and other countries.

We are grateful for the opportunity to present activities of ETG Engineering and the Institute for Energy Efficiency and Ecology at the Conference.

We believe that this Conference will give us help in the future to achieve the set goals, and the cooperation that we have to be further improved.

Best regards

Mladen Bajković

Executive director
